Mr S. Marshall,  
Marlin.  
40 First Avenue,  
Selly Park,  
Birmingham. B29 7NS.

Dear Mr Marshall,

Thank you coming to our nursery last week to do the first aid course for Paediatric Life Support.

We found the course very interesting and informative. The staff found the course to be practical and absorbing. The fact that the course ran over two evening sessions in close succession was a great advantage, rather than a long six week course.

Everyone was impressed with the module system instead of an examination at the end of the course. With staff all learning at the same time there was a relaxed atmosphere in which everyone was able to help each other as the course progressed. The tutoring was very efficient covering all aspects comprehensively and with a twist of humour.

At the end of the course we received our certificates promptly. We were all glad to have taken the course and gained first aid knowledge.

Yours sincerely

Mrs M Hanson.  
Nursery Manager

3<sup>rd</sup> August 1998

Dear Stuart,

I am writing on behalf of the Nursery staff and myself to thank you for the first aid training you did for us on Friday 3<sup>rd</sup> July. The staff who attended the course, which as you know was practically the whole staff team, found it to be extremely informative and very relevant to our work with under **five's**.

It is rare to find a course that specifically deals with under five's and we are grateful that the skills you have provided us with will greatly benefit the children in our care. Many of the staff now have much more confidence to respond immediately to the children's first aid needs. The course was well delivered and full of up to date information which was very useful.

I wouldn't hesitate to recommend your courses to other nurseries and if anyone would like to talk to me about this directly, I am happy to be contacted on the above telephone number.

Thanks again

Viki Green  
Nursery Manager
